

IRLA ACADEMY WORKSHOP

Insurance run-off accounts explained

OVERVIEW

A course for non-accountants and non-insurance accountants alike, from introductory to intermediate level, aiming to explain the key features in insurance run-off accounts.

TARGET AUDIENCE

This session is suitable for those who work in accounts, finance, M&A, commutations, reserving, or produce Solvency II or other financial transactions. For anyone who has a passing interest, but several years in the legacy market, this would be an appropriate information source.

LEARNING OUTCOMES

At the completion of this session delegates will be able to:

- Read a balance sheet and P&L account and be aware of the relevance of entries
- Utilise knowledge gained to work through the terminology used in the accounts
- Draw from the information how a run-off company is performing and how this information can aid valuation estimates.

All speakers have many years' practical experience in their professional fields, and their real life practical responses will help every delegate. Biographies can be found on the event page of our website.

VENUE

Online event. A Zoom link will be sent with joining instructions prior to the course.

COST

Prepay £195 inc VAT for members, £295 for non members.
