

ESG comes to an Association near you!

IRLA, as a trade body, likes to keep up with market and other relevant corporate issues and has for several years taken its *Environmental* effect into account. We are committed to recycling within our Secretariat office. We are consistently recycling over 90% of the waste collected, which is not burnt or sent to landfill. In addition, all the paper we use in the printers is FSC approved and thus sourced responsibly. We have a number of green initiatives around the use and re-use of computer and printing equipment, including night-time shutdown and the recycling of old equipment with local charities.

We only have LED lights in the office and have temperature controls for both the use of cooling and heating the premises, both of which are voluntary restricted use. We have a water filter for all drinking water.

However, as a trade body we can only recommend products from sponsors if they wish to provide marketing goods. We do not encourage one use plastics or anything disposable. IRLA only purchases paper or pens for multiple use by delegates/members.

If you have any comments or queries on this or any other aspect of our work, please do contact us directly of here + 44 (0) 203 026 3336, secretariat@irla-international.com
